

# Cullahill Wind Farm

## Cullahill Community Information

Galetech Energy Developments are assessing the potential for a wind farm in the Cullahill area of Co. Laois.

We are installing an 80 meter met mast on the site in March 2025 in order to complete a wind feasibility study.

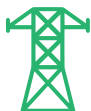

Should you have any questions relating to these surveys, please do not hesitate to contact us on:

## FAQ

### What a metmast?

A measurement mast, also known as meteorological tower or meteorological mast (met tower or met mast), is a tower which carries measuring instruments with meteorological instruments, such as thermometers and instruments to measure wind speed.

### Why are we putting it up?

A desktop survey has identified this area as having suitable wind conditions for a wind farm.

### What do I have to do?

Right now, there is no action for anyone to take. We will keep you updated. However, if you need to ask us further questions, please contact Deirdre on 087 1163978
